

## Make It Soon

Doris Day

When will you be near me  
Darling, won't you make it soon  
If your heart can hear me  
Darling, won't you make it soon  
Every star above me  
Knows we shouldn't waste the moon  
If you really love me  
Darling, won't you make it soon

Till you come to stay, I'll worry watching every lonely day  
Slipping away  
Come and hold me close and then I'll never know that loneliness  
again  
Never again

Please I need you near me  
Darling, won't you make it soon  
If your heart can hear me  
Darling, won't you make it soon

Till you come to stay, I'll worry watching every lonely day  
Slipping away  
Come and hold me close and then I'll never know that loneliness  
again  
Never again

Please I need you near me  
Darling, won't you make it soon  
If your heart can hear me  
Darling, won't you make it soon
