## Ceremony

So here is the ritual I can't tell you what I go through I've been through heaven and hell for you All night All night long Satin dreams all covered in sweat When I wake, hot to the touch I swear to god you'll be the death of me yet You are my ceremony You are my ceremony You are my ceremony Oh (Now) Here we are Both skin to skin Your body sacred We're about to begin All night All night long Watch the moon Let it drop from the sky Understand I might draw first blood But I won't sting like the rattlesnake bite One day you'll feel like I do A fire deep in the heart so true If I take you, understand I might explode like a bomb in your hands You are my ceremony You are my ceremony You are my ceremony Oh So, what should I say Is it the ancient death of lovers Oh, is it the coming rain Or is it the passion of something more strange, yeah You are my ceremony You are my ceremony You are my ceremony

Oh
