

Keep It On A Low

Dot Rotten

Here's a 3 minutes story, that will last more than the last time
For your Hi-Fi, ears tingle sounds like a single, it's got the right vibe
I ride in the clouds when it's high time
Looking around at the bright sky
I feel like an alien staring down at the earth and my life's like a Si-Fi
The time that we have is precious
Buying the seconds, is this a slice of heaven
Have i the right intention
I ain't impressed with hate or a violent message
Surrounded by connections, timeless friendship
Smiling like our life is stress less
We're moving in the right direction

Keep it on a low
We're just over here stacking up some paper
We are planning we are planning to live greater... but we just
Keep it on a low
We've been through some ups and downs
When there was no love around
We rolled through the underground but
Keep it on a low
If I showed you what it's like, will I really be your type, your chilling with me tonight but
Keep it on a low
My whole families inside, in this rave there's a vibe, its MINARMY but quite
Keep it on a low

Key to the game got it locked like a locksmith
I'm about top notch watch when i drop this
Venom and toxi rhymes, with a goblin mind
You'll see Dot close by were the boss is
Came from streets filled with sirens coppers, violent shooters, blocks full of crime
I was grimy obvious
Now my work is reside inside the office, rising the profit, why should I stop this
Brought into success, I've been adopted
Dots gonna shine, till your eyes go blind and your tired of watching
It's about time there admiring Rotten
Volume louder right when I'm cotching
When I drive by you cry like a lost kid
Got your life savings twice in my pocket but just

Keep it on a low
We're just over here stacking up some paper
We are planning we are planning to live greater... but we just
Keep it on a low
We've been through some ups and downs
When there was no love around
We rolled through the underground but
Keep it on a low
If I showed you what it's like, will I really be your type, your chilling with me tonight but
