

They don't make love like they used to

Dottie West

They just don't make love like they used to
they stone a heart
that's warm and true
It seems to fall apart no matter what we do
They just don't make love like they used to
Love just don't hold on like it used to
it dies before it's halfway through
And it seems to fall apart no matter what we do
They just don't make love like they used to
I remember when I loved you meant all the world
They just don't make love like they used to
[strings]
It seems to fall apart no matter what we do
They just don't make love like they used to
I remember when I loved you...
They just don't make love like they used to
