

How Lucky We Are

Douwe Bob

We got the upper hand
A random set of cards
Try and see my friend
How lucky we are
You got your big eyes fixed
On the rearview mirror
I say we look ahead
To see how lucky we are

And it's a strange life
It's a great ride

There's a light that you don't see
You're the light that shines on me
We got everything we need
To make this work

We live a long, long time
And feel life is short
We got all we need
And yet we still want more
We got the upper hand
A random set of people
Such very close friends
How lucky we are

And it's a strange life
It's a great ride

There's a light that you don't see
You're the light that shines on me
We got everything we need
To make this work

Oh, we got all
Oh, we got all we need

There's a light that you don't see
You're the light that shines on me
We got everything we need
To make this work
