

## Keep Driving

Douwe Bob

Windows open, pedal to the floor and I'm gone  
Just keep driving, keep the thoughts alive and  
Maybe someday I can clearly see what's ahead  
All facts, never looking back

Better days are coming, I guess it's now or never  
Trying to forget you is harder now than ever  
These trees around, they give me air  
The streets are dark and the light is all around  
And I feel I found the strength to lift the weight that kept me down  
My heart is open and that's how I like it

Every step a little brighter  
Every word a little wiser  
Taking it just one day at the time  
Now that I am standing taller  
Everything is getting smaller  
Every storm will pass and I will be all right

Windows open, pedal to the floor and I'm gone  
Just keep driving, keep the thoughts alive and  
Maybe someday I can clearly see what's ahead  
All facts, never looking back  
It's only me and the radio is on and  
It's on eleven 'cause it's my favorite song  
Windows open, pedal to the floor and I'm gone  
I just drive, it's good to be alive

I'm staring out the window, already getting better  
The sky looks so much clearer, much clearer than I remember  
A little lighter than I thought it'd be  
I realize that everything and everyone I love  
Is much more than I pray it's a gift from up above  
It's more, more enough for me

Every step a little brighter  
Every word a little wiser  
Taking it just one day at the time

Windows open, pedal to the floor and I'm gone  
Just keep driving, keep the thoughts alive and  
Maybe someday I can clearly see what's ahead  
All facts, never looking back  
It's only me and the radio is on and  
It's on eleven 'cause it's my favorite song  
Windows open, pedal to the floor and I'm gone  
I just drive, it's good to be alive
