Livewire

Down with Webster

I'm coming out the darkness
Just before the day breaks
Like the sun, we're on the rise
And though our eyes look happy
Just know we're ready
Watch us all come alive tonight

Some may say we're lost, yet we're out of mind
But we don't hear them talk, we're on a different line
We are who we are, we're betting for old times
Yeah, we'll be all right
We'll be just fine

We keep running out of time
We've been running all our lives
Looks like a wildfire
'Cause we're still a live wire
A hundred miles above the ground
Don't look back and don't look down
I'm like an empire
'Cause we're a live wire
A live wire
A live wire
A live wire

Nothing lasts forever
So it's now or never
Coming back from the afterlife
Another bridge we're burning
But the world keeps turning
But come around like a satellite

Some may say we're lost, yet we're out of mind
But we don't hear them talk, we're on a different line
We are who we are, we're betting for old times
Yeah, we'll be all right
We'll be just fine

We keep running out of time
We've been running all our lives
Looks like a wildfire
'Cause we're still a live wire
A hundred miles above the ground
Don't look back and don't look down
I'm like an empire
'Cause we're a live wire
A live wire
A live wire
A live wire

We are, we are all shining stars
We've come this far, it's all so hard
We are who we are, all shining stars
We've come this far, it's [?]

We keep running out of time
We've been running all our lives

Looks like a wildfire
'Cause we're still a live wire
A hundred miles above the ground
Don't look back and don't look down
I'm like an empire
'Cause we're a live wire
A live wire
A live wire
A live wire

Looks like a wildfire
'Cause we're still a live wire
A hundred miles above the ground
Don't look back and don't look down
I'm like an empire
'Cause we're a live wire
