

# Take Us Alive

Down with Webster

A simple bit of conversation  
All we ever do is talk [?]  
The stars in our imagination, oh  
And we're living [?] in the end

Go tell everyone  
To tell everyone  
This ride, it's begun  
This gun is locked and loaded  
Don't try this at home  
We want everyone  
Pull the [?]

I feel like time stands still when we're all alone  
We make the sparks set fire and then watch it grow  
And if the stars burn out, you know we'll still glow  
Like it's the best night we'll ever have  
And they'll never take us alive  
Like it's the best night we'll ever have  
And they'll never take us alive

I think I had a revelation, oh-oh  
The only thing left to stop us, oh  
Is a little bit of hesitation, oh  
And we on our way to pretend

Go tell everyone  
To tell everyone  
This ride, it's begun  
This gun is locked and loaded  
Don't try this at home  
We want everyone  
Pull the [?]

I feel like time stands still when we're all alone  
We make the sparks set fire and then watch it grow  
And if the stars burn out, you know we'll still glow  
Like it's the best night we'll ever have  
And they'll never take us alive  
They'll never take us alive  
Like it's the best night we'll ever have  
And they'll never take us alive

[?]  
We can get high if you let me  
Like the day you met me  
Take a deep breath, let's see

Let me take this [?] flame, I can make it bigger  
Tell me how it feels, with your finger on the trigger  
Take that shot, fire effortlessly  
[?]  
Now you're strapped in, in control  
You want everything you missed before  
I got everything you missed and more  
So come run to me while they run for cover tonight

And we could have it all  
Yeah, we could have it all, oh-oh

I feel like time stands still when we're all alone  
We make the sparks set fire and then watch it grow  
And if the stars burn out, you know we'll still glow  
Like it's the best night we'll ever have  
And they'll never take us alive

I feel like time stands still when we're all alone  
We make the sparks set fire and then watch it grow  
And if the stars burn out, you know we'll still glow  
Like it's the best night we'll ever have  
And they'll never take us alive
