

Best Part of You Was Me

Downplay

Trapped inside your Venous smile
Poisonous hello
You took what you wanted from me
Then I watched you go

And if you think that you're my friend
There's something you should know

You are just a memory
You're more than dead to me
I am just a cold machine
Left in your old debris
Living in the misery
That's all you'll ever be
Cause the best part of you was me

Once you found my beating heart
You dug your hooks inside
Feeding on the light and leaving
Emptiness behind

And when I say that you're my friend
It's nothing but a lie

You are just a memory
You're more than dead to me
I am just a cold machine
Left in your old debris
Living in the misery
That's all you'll ever be
Cause the best part of you was me

And in the end you're gonna wish you never threw it away
Woah
After all you know I'm more than better off anyway
Anyway
Anyway
Anyway
Better off anyway!
Better off anyway!

You are just a memory
You're more than dead to me
I am just a cold machine
Left in your old debris
Living in the misery
That's all you'll ever be
Cause the best part of you was me
