

Red Window

Downplay

I met her after midnight
Under the voodoo lights
Her eyes tricked me to stay
I knew it wasn't right

But she's paid to keep her secrets
And I paid the price
I tried to stay away
But I'm an addict
And she's the vice

Does she know when I'm out there?
In the dark alley I stare
As the red light fills the air
Of a nightmare

I still see her
In the red window
Naked in the glow

She's a disease
That's killing me
Behind the shadows
And on and on it goes

I pass her every day now
I walk right by
She never has a thing to say
She just stares me in the eyes

Does she know when I'm out there?
In the dark alley I stare
As the red light fills the air
Of a nightmare

I still see her
In the red window
Naked in the glow

She's a disease
That's killing me
Behind the shadows
And on and on it goes

I can't wash you off my skin
My body hates me again
I can't wash you off my skin
My body hates me again

(And on and on it goes)
(And on and on it goes)
(And on and on it goes)
(And on and on it goes)

I still see her
In the red window
Naked in the glow

She's a disease
That's killing me
Behind the shadows
And on and on it goes

I still see her
In the red window
Naked in the glow

She's a disease
That's killing me
Behind the shadows
And on and on it goes
