Can't stop can't stop can't stop positive energy  
Won't stop won't stop won't stop positive mind

I jam like a digital codex  
Computed phonetics no I don't value a Rolex  
Not stimulated by luxury brand names  
But by logic meant to enrich ghetto terrain  
Digits no significant hidden limits  
Representing all elements take a minute to listen  
Urban word Smith determined keep learning  
Multiple verses scroll in hand like a sermon  
Tested at a high rate witness my mind race  
No room for mistakes I know what it might take  
Beats per minute banging speakers that blast  
Never surrender mind of an outcast

Can't stop can't stop can't stop positive energy  
Won't stop won't stop won't stop positive mind  
Can't stop can't stop can't stop positive energy  
Won't stop won't stop won't stop positive mind

Knowledge of self still rains  
Scientific expertise in the cells of my veins  
Masters of modern civic thoughts  
Current version developed for bonds never forgot  
No filters I thirst for the craft  
First maniac with freestyle skill with the flavor  
That burst selected ethnic metric  
Method of tension prophetic  
Intention to flip your whole section  
Silence broken infectious connection  
Strictly spoken the plan to uplift  
In the face of creation we stand and resist

Unprecedented political subjects  
We cannot afford to ignore  
The fatigue of this era of conflict  
And the effort to restore  
Common moral positions  
Should have been enough to prevail  
The supervision and oversight of establishment  
Once more has failed

Can't stop positive energy  
Can't stop positive mind  
Won't stop positive energy  
Won't stop positive mind
