

# Sleep

Downstait

It's a little too dark inside my mind  
Then a little sunlight comes through the blinds  
Blackouts and stakeouts, they help me in the end  
Put my face down to the floor now to rest my soul again

But I'm just a little too tired  
A little too wired  
The world is overwhelming and now

I just wanna sleep like I used to  
Just a little peace from the world  
I just wanna dream like the kids do  
Just a little tease of what I thought this would be

I'm a little too broken to be fixed in time  
To have a sliver of a chance to ever get to close my eyes  
Pressures and lectures, they haunt me through the day  
Take the good times and emotions and throw them all away

But I'm just a little too tired  
A little too wired  
The world is overwhelming and now

I just wanna sleep like I used to  
Just a little peace from the world  
I just wanna dream like the kids do  
Just a little tease of what I thought this would be

Rejection, agitation  
Procrastination, complication  
Fixation, prevention  
Humiliation, annihilation

I just wanna sleep like I used to  
Just a little peace from the world  
I just wanna dream like the kids do  
Just a little tease of what I thought  
I just wanna sleep like I used to  
Just a little peace from the world  
I just wanna dream like the kids do  
Just a little tease of what I thought this would be
