

Twilight Zone

Dr. John

When all the clouds in the sky
Disappear in front of your eyes
When you hear a lullaby
You once knew, now you can't recognize

You step into the twilight zone
In the outer limits of a land unknown
In the twilight zone

Martians kidnapped the first family
They gonna demand New York City for ransom now
We gonna outsmart them even though they own memory
The best they can get is Milwaukee

In the twilight zone
In the outer limits of a land unknown
In the twilight zone
Ain't nothing you can do about it
When you're in the twilight zone

John and Robert Kennedy
Have set the stage for you and me
The reverend Dr. Martin Luther King
Lived the way Jesus would have him do his thing
But where are they at?
Somewhere in the twilight zone

In the twilight zone
In the outer limits of a land unknown
In the twilight zone
