

# When I First Saw Your Face

Dr. John

When I first saw your face  
I thought if an angel could be  
Standing so close  
With you in heaven with me

When I first felt your eyes  
Looking into my soul  
How could I tell you?  
It was my heart you stole

When you kiss my lips it feels like a reverie  
When you speak my name it sounds like a song  
Waking to find distant memories  
Keeping my heart beating so strong

When I'm holding your hand  
Or just thinking of you  
Something will tell me  
That what I'm feeling is true

For more than a day  
It's gonna last for all time  
There's no mistaking  
That you will always be mine

When you kiss my lips it feels like a reverie  
When you speak my name it sounds like a song  
Waking to find distant memories  
Keeping my heart beating so strong

When I first saw your face  
I thought if an angel could be  
Standing so close  
With you in heaven with me

When I first saw your face
