

# Full Throttle

Dr. Sin

"We're talking fucking rock 'n' roll yeah"

Ignition baby, it feels alright  
The engine is rocking, it's time to roll

The iron dragon is spitting fire on the road  
I just can't help, it warms my soul  
I make myself at home, wherever I may roam  
I feel the fire burning cold

The lonely rider hits the road  
Trying to find himself again  
He fights his demons on his horse of steel  
He's running like the wind  
His destiny on his wheels  
Each mile leaves the world behind  
Makes the past fade away

It's fading away

I feel the wind babe, it feels so good  
I love the dust, I love the steam

The iron dragon is spitting fire on the road  
I just can't help, it warms my soul  
I make myself at home, wherever I may roam  
I feel the fire burning cold

The lonely rider hits the road  
Trying to find himself again  
He fights his demons on his horse of steel  
He's at full throttle going fast  
Another town, another place  
He's running like the wind  
His destiny on his wheels  
Each mile leaves the world behind  
Makes the past fade away

It's fading away

The lonely rider hits the road  
Trying to find himself again  
He fights his demons on his horse of steel  
He's running like the wind  
His destiny on his wheels  
Each mile leaves the world behind  
Makes the past fade away

It's fading away
