

# Lonely World

Dr. Sin

Nothin's gonna change  
Life won't rearrange  
To make things easier on you  
It's up to you  
This time will surely be  
It's the only chance we have  
There is no escape  
We have all been raped  
We are crying in the dark  
We can light the way  
Make a better day  
But it can't be done alone

It's a hard life

The price of life is so high  
When you're on your own  
Better think about it  
We can keep the dream alive  
If we are strong it's a lonely world  
No one hears you when you cry  
If you're all alone better think about it  
We can keep the dream alive  
We must be strong in this lonely world

People everywhere  
Runnin', strumblin', scared  
There's no place for us to hide  
We must make a stand  
Reach out, take a hand  
We are all we have
