

# Riot

## Dragged Under

"We interrupt our program to bring you this important message"

Yeah yeah  
Yeah yeah

Silence your speech  
Stay a slave to the screen and it's never ending  
Wolves leading sheep  
Make you practice what they preach just to keep you spending  
They fake a smile while they praise your commitment  
It ain't a choice if it's a crime to resist it  
Can't even use what you own if you don't pay the toll

Woah  
Yeah yeah!  
If you want what I got (woah)  
Come try and take it

We'll start a riot, never keep us quiet  
Fighting on and on and on (on and on and on)  
A home divided up in arms one sided  
All the love we used to share is gone  
Force fed what they put in our head  
We're beaten down but we're not quite dead yet

So you think you've got a say inside this game that they play?  
Pre-selected politicians passing pennies for change  
Are you gonna kiss the ring or will you cut your strings  
Strike a match (Strike a match)  
(We're setting fire to everything!)

Woah  
Yeah yeah!  
If you want what I got (woah)  
Come try and take it

We'll start a riot, never keep us quiet  
Fighting on and on and on (on and on and on)  
A home divided up in arms one sided  
All the love we used to share is gone  
Force fed what they put in our head  
We're beaten down but we're not quite dead yet  
We'll start a riot, never keep us quiet  
Fighting on and on and on (on and on and on)

We are the new generation  
The under-minded, the angry, the hated  
This world is ours  
It's time to take it back  
We are the new generation  
We are the new generation

We'll start a riot, never keep us quiet  
Fighting on and on and on (on and on and on)  
A home divided up in arms one sided  
All the love we used to share is gone  
Force fed what they put in our head

We're beaten down but we're not quite dead yet  
We'll start a riot, never keep us quiet  
Fighting on and on and on (on and on and on)
