

This Time

Dragon

Gonna sit down and talk to myself
I won't let temptation get me off my shelf
This time I'm gonna take your hand
Gonna make you, make you understand now
This time
This time
This time gonna head in the right direction
In the right direction

Gonna sit down and talk to myself
I won't let nobody get me off my shelf
This time I understand
Gonna make it to the promised land
This time
This time
This time gonna head in the right direction
In the right direction

Open your eyes to the sun
So many roads you can run

Sun and the sea birds in the air
Now I, I lost my love and I don't care
Oh no

This time I'm gonna take your hand
Gonna make you to the promised land
This time
This time
This time gonna head in the right direction
In the right direction

This time
This time
This time gonna head in the right direction
In the right direction
In the right direction
In the right direction
In the right direction
