

Evening Star

DragonForce

We will sail on forever on, to the land of the evening
star...

Into the endless we ride
Unveil the darkness behind
Abandoned glory hidden, castaway we ride

Now will the sky surrender
Forever through the nether
A silent whisper echoes through my restless heart
tonight

I will see the glory rise
We'll be one tonight
Don't you shut your eyes in silence
Tonight gather near, come and live your fear

In a land of desire your heart filled with fire
You live for the right to be free
We will sail on, forever on to the land of the evening
star
In a land of desire your heart filled with fire
The land of the evening star

Now and forever after
Asylums filled with laughter
Suspicion haunts my dreams
An echo through my mind

This starlit gaze reminds me
Are you so blind you can't see?
The winds of change my friend
Will blow for you in the dead of night

I will see glory rise
We'll be one tonight
Don't you shut your eyes in silence
Tonight gather near, come and live your fear

In a land of desire your heart filled with fire
You live for the right to be free
We will sail on, forever on to the land of the evening
star
In a land of desire your heart filled with fire
The land of the evening star
