

Welcome to the Afterlife

Dragonsfire

Remembering the days of your past
The future came to you without a warning
Dying for some things not meant to last
A wasted life with nothing left behind

Fear the things to come
A dreadful fate is yours
The gods have set the course

Lost in the storm - welcome to the afterlife
Dragons in the sky - welcome to the afterlife
Twilight and fear - this is just your afterlife
Day and dream unite - the final days have begun

Hiding yourself from being alive
The reaper's out to get you everyday
The hourglass is running on and on
Do you want to know what will become?

Misty scenes of death
Visions of the realm
Noone told you what it's like

Lost in the storm - welcome to the afterlife
Dragons in the sky - welcome to the afterlife
Twilight and fear - this is just your afterlife
Day and dream unite - the final days have begun

We all live on the run
The final days have begun

We all live on the run
The final days have begun

Lost in the storm - welcome to the afterlife
Dragons in the sky - welcome to the afterlife
Twilight and fear - this is just your afterlife
Day and dream unite - the final days have begun

We all live on the run
The final days have begun

We all live on the run
The final days have begun
