

Magic

Dragony

(Houdini:)

I have looked for answers
Wherever I did roam
I traveled far, and traveled wide
Yet I have found no home

This magic keeps me company
Keeps me safe and keeps me warm
It is guiding like a beacon
Giving shelter from the storm

I light a fire
In the coldness of the wild
It's burning higher
And their eyes look on beguiled

Light the sky
See through the mind's eye
Ride the rainbow
Rising up high

To the light where we belong
And there's magic in every song

Ride the sky
Together we fly
Through the darkness
That we defy

And we won't be apart
By the magic of our heart

(Rudolph:)

I have damned the wise men
I have cursed and I deplore
I've broken vows and cast these spells
I'm desperate to the core

I'm looking for salvation
There's no redemption here
There's darkness and damnation
And sorrow born from fear

I curse the fire
That burns in people's hearts
And I desire
The power of dark arts

Tame the night
By dark raven's flight
Curse the heavens
And true love denied

To the shadows we belong
And there's magic in every song
Ride the sky
Unraveled we fly

Into darkness
We can't defy

And you tear me apart
With the magic of your heart

Light the sky
See through the mind's eye
Ride the rainbow
Rising up high

To the light where we belong
And there's magic in every song

Ride the sky
Together we fly
Through the darkness
That we defy

And we won't be apart
By the magic of our heart
