

Let's Drive

Drake Bell

Lights up on the scene
Where tired cliches won't let us fall asleep
We're punching the pillows and tangled in sheets
And no one's listening
Don't say anymore
You've thrown all our pictures, I've slammed every door
Let's just take your car like we used to before
When we'd go missing

Let's drive right past the exits and stop signs
Let's try to forget that we both know we messed up
We've already wrecked this
We won't talk about that tonight
Let's drive

How can we get back
To another lost weekend with no strings attached?
'Cause we're tied up in knots that're unraveling fast
There's something missing

Let's drive right past the exits and stop signs
Let's try to forget that we both know we messed up
We've already wrecked this
We won't talk about that tonight

Seen how this plays out
We're just gonna crash or break down
But maybe this time when the road winds
We'll try to turn this around
We can turn around, so
So let's drive right past the exits
We're all right for now (So let's drive)

Let's drive right past the exits and stop signs
Let's try to forget that we both know we messed up
We've already wrecked this
We won't talk about that tonight
We won't talk about that tonight
We won't talk about that tonight
Let's drive
