

Move On

Drake Bell

I follow your lead right down to the letter
I built you a home to beat off the weather
I painted the wrong house
'Cause you made up your mind and left me behind
Who built you a fire, who gave you the covers?
You said I was so far in front of the others
But I'm last in a long line
Of people who say, you're the one that got away

My whole world is black and blue
You're everything I knew
If I could get over you

I could move on
I could move on

The day is a new the past is forgotten
But I remember when I feel rotten
'Cause I'm sick of the same things
Gotta open my mind and leave her behind
With everyday I feel a lot stronger
'Cause yesterday don't live any longer
Yeah the future is so bright
I gotta kick up the dust and make it a bust

My whole world is black and blue
You're everything I knew
If I could get over you

I could move on
I could move on

Out in the air, it's just the way it was
Tell me is it just a dream?
Is it really you?
Or is it something I made up?

'Cause I can see your face, every single day
Tell me this not a dream!
Lying next to me, then I open up my eyes
And I wake up!

My whole world is black and blue
You're everything I knew
If I could get over you

I could move on
I could move on
I could move on
I could move on

I could move on
