

# Live Some

Drake White

Yeah we never really know how it's all gonna go  
But the world keeps spinning, even if it's slow  
Sometimes  
Well we leave and we stay, let the wind lead the way  
We don't live forever, gotta make a little hay  
While the sun shines  
We get lost some, we get found some  
We get high and we get down some

We live some, we love some  
Fall down and get up some  
We fly some, we sing some  
Get hurt so we drink some  
We take some, we give some  
Forget and forgive some  
Some days all you got is a rock in your shoe  
But you still gotta move before you die, all we do is  
Live some

Give your heart to a few, get it broke a time or two  
Then you put it back together, yeah forever needs some glue  
Sometimes  
Make a promise, settle down, rip the roots from the ground  
Plant 'em in another town  
Where the river runs wild  
We're young some, yeah we're old some  
We go out into the world and go back home some

We live some, we learn some  
Build bridges then burn some  
We buy some, we sell some  
Chase heaven and raise hell some  
We break some, we fix some  
Can't help but talk shit some  
Some days all you got is a rock in your shoe  
But you still gotta move before you die, all we do is  
Live some

So get to livin'  
Don't cry about that spilt milk on the floor  
Do some laughing, do some fishing  
And find a little quiet in the noise

And live some, and love some  
Fall down and get up some  
We fly some, we sing some  
Get hurt so we drink some  
We take some, we give some  
Forget and forgive some  
Some days all you got is a rock in your shoe  
But you still gotta move before you die, all we do is  
Live some
