Rated R

DRAM

When you think about me, do you touch yourself
'Cause I think I might be the man of your dreams
And when you're 'round me, do you trust yourself
'Cause when you're locked up in my sheets, you let yourself free
And do you really think I love yourself
Do you think it might be the way that it seems
But take your time with me, don't hurt yourself
'Cause when shit gets deep, can't blame it on me

And when I'm, and when I'm coming, do you nut yourself
Did I hear you just scream or is that the TV
We'll just keep watching while I fuck yourself
It's a really nice scene, as you can see
And do you hate when I ignore yourself
'Cause the times in between, we never do speak
So take your time with me, don't hurt yourself
'Cause when shit gets deep, can't blame it on me

And so she go, go, go
And so she go, go, go
And so she go, go, go
Now we both go, go, go, yeah

When you think about me, do you touch yourself
'Cause I think I might be the man of your dreams
And when you're 'round me, do you trust yourself
'Cause when you're locked up in my sheets, you let yourself free
And do you really think I love yourself
Do you think it might be the way that it seems
But take your time with me, don't hurt yourself
'Cause when shit gets deep, can't blame it on me

I like the way you pull up on me
You know I came for the ride
I like the way that you touch on me
Can you spend the night
I like that tip that you drill on me
I see you slip in to slide
I know it's type cold when you roam from me
Can you stay inside
In my universe of this good good
Shoot my club, I really wish you would

Get so high
Just can't stop
We get so high
Just can't stop

When you think about me, do you touch yourself
'Cause I think I might be the man of your dreams
And when you're 'round me, do you trust yourself
'Cause when you're locked up in my sheets, you let yourself free
And do you really think I love yourself
Do you think it might be the way that it seems
But take your time with me, don't hurt yourself
'Cause when shit gets deep, can't blame it on me
