

# Abuse The World

Drapht

Blindfolded, dodging cannon fire  
Adrenaline higher than your reach  
Take a seat, I can't and I rock a set like concrete  
This beat's taken hostage by Drapht  
when nightfall sets, best not cut through our parks  
To embark on this quest  
I push myself to extremes, abuse the rules of death  
Refuse to leave a mess, get dragged to the dust  
My mind frame, the nice pain and feeds off lust  
Hard to trust with a head full of hate  
Keep my enemies close by hanging with the snakes  
High stakes when heavy material drops  
Better watch out below, it destroys on the spot  
Whether or not this shit gets you lifted  
The pure dope, you don't need a prescription  
Fit a description of a figure in your nightmare  
The dream-slayer, my complexion is quite fair  
You dare face up, kid, that's a fantasy  
Time to wake up, it's too heavy to handle me  
Human weaponry, spit with no concern  
and intense sixth sense to rip pens and burn

I abuse the world and take what's mine  
I refuse to dwell on the negative minds  
Get brought down, man, that's out of the question  
Live my life day to day and learn from my lessons  
I abuse the world gonna take what's mine  
I refuse to dwell on the negative minds  
Get brought down, man, that's out of the question  
Live my life day to day and learn from my lessons

It's just a matter of belief  
I seek for the right degree of heat to shadow when I speak  
Advance to a peak and never decline  
so face the facts and when it stops, press rewind  
It's crunch-time, you swallow or you choke  
Just a dysfunctional kid that appears from the smoke  
The mental note that's stuck in my head  
"Fight to death, never come off second best"  
None-the-less disaster calls of the tribes  
As Drapht sees all with telescopic eyes  
Live to survive, arise to rebel  
Street-wise, so fuck size, I only hide from hell  
Beware, I spell words like a warlock  
You better run for cover when you hear the door knock  
A raw lock with Syllabolikal power  
Night-stalking prowler, we hunt then devour

I abuse the world and take what's mine  
I refuse to dwell on the negative minds  
Get brought down, man, that's out of the question  
Live my life day to day and learn from my lessons  
Abuse the world gonna take what's mine  
I refuse to dwell on the negative minds  
Get brought down, man, that's out of the question  
Live my life day to day and learn from my lessons

As that begins, I'm trapped in a heatwave  
Trek through sandstorms, my bare feet grazed  
Discover ways to release all anger  
Bloody revenge, it's a graphic world of Manga  
I transform, leave you no option  
Release more hot shit than a police auction  
Toxic toxins enter your blood-streams  
Take your legs from under ya faster than gangrene  
Ghost train screams killed by the elements  
As I roam this quite a higher intelligence  
No evidence could shut down this operation  
Burning sensation, Syllabolik organisation

I abuse the world and take what's mine  
I refuse to dwell on the negative minds  
Get brought down, man, that's out of the question  
Live my life day to day and learn from my lessons  
Abuse the world gonna take what's mine  
I refuse to dwell on the negative minds  
Get brought down, man, that's out of the question  
Live my life day to day and learn from my lessons
