

Atmosphere

Drax Project

Somebody told me I'm crazy but I know I'm not
Dirt on my face but I'm still gonna work 'till I drop
Always heard that
You put your heart and soul in
All your blood and bones then
Everyone's gonna forget that you weren't at the top

But when you're on the bottom oh, it feels like
All the stars are falling for someone else
It's hard to see tomorrow until it comes
With these ripped up dreams and holes in my pocket
I'm so high see me fly like a rocket

I'm burning my way through the atmosphere I could go anywhere
And I know that it won't be long
I'm burning my way through the atmosphere getting the hell out of here
'Cause I know that's where I belong
Yeah I've been here all along

Somebody told me that over the moon was too far
But your feet never move from the earth if you're scared of the dark
Always heard that
You'll get where you're going
Just keep your heart wide open
You're the only one who's keeping it locked

But when you're on the bottom oh, it feels like
All the stars are falling for someone else
It's hard to see tomorrow until it comes
With these ripped up dreams and holes in my pocket
I'm so high see me fly like a rocket

I'm burning my way through the atmosphere I could go anywhere
And I know that it won't be long
I'm burning my way through the atmosphere getting the hell out of here
Cause I know that's where I belong

You may say I'm stubborn, mm
Yeah I get that a lot
I'm human that's my problem
I won't give up on these ripped up dreams with holes in my pocket
I'm so high see me fly like a rocket

I'm burning my way through the atmosphere I could go anywhere
And I know that it won't be long
Yeah I been here all along
I'm burning my way through the atmosphere getting the hell out of here
Cause I know that's where I belong
Yeah I've been here all along

Been here
Yeah I've been here all along
Been here
Yeah I've been here all along
Been here
Yeah I've been here all along
Been here

Yeah I've been here all along
Been here
Yeah I've been here all along
Been here
