

City Lights

Drax Project

The city lights illuminate
As I walk down the hill at night
The moon and I
You know exactly how you feel in terms of me
I know exactly how I feel in terms of you

Would you believe me if I told you
That I feel that way
And if I called your name would you
Come running to me
'Cos I need you to see

We're in the moment am I dreaming
It's the connection that we're feeling
And as the lights shine brighter
I can see you clearly
I can see you through the city lights
Through the city lights
Through the city lights

The city lights illuminate
The sky is full of stars tonight
I'm on your mind
I know exactly how you feel in terms of me
You know exactly how I feel in terms of you

Would you believe me if I told you
That I feel that way
And when I called your name I saw
You running to me
Now I know we can be

We're in the moment am I dreaming
It's the connection that we're feeling
And as the lights shine brighter
I can see you clearly
I can see you through the city lights

We're in the moment am I dreaming
It's the connection that we're feeling
And as the lights shine brighter
I can see you clearly
I can see you through the city lights
Through the city lights
Through the city lights
Through the city lights
Through the city lights

See me through the, see me through
Can you see me through the city lights
See me through the, see me through
Can you see me through the city lights
See me through the, see me through
Can you see me through the city lights
See me through, see me through the
Can you see me through the city lights

We're in the moment am I dreaming
It's the connection that we're feeling
And as the lights shine brighter
I can see you clearly
I can see you through the city lights

We're in the moment am I dreaming
It's the connection that we're feeling
And as the lights shine brighter
I can see you clearly
I can see you
Through the city lights
Through the city lights
