

Cold

Drax Project

Take me far away
'Cause I've got to let you go
Could've made the big mistake
But I've seen you be-before
Seen you babe
She said
Can you tell me what you want from me
'Cause I need to know
So take me far away
'Cause I've got to let you go
Got to let you go

I can't stand it when you come too close
The feeling takes me under
I hold my breath so I can hold my own
Just feels like everything I've ever known
Is just how to be alone with you

Seems like nothing is ever gonna change
Just let me walk away
'Cause I can't imagine standing without pain
I'm falling for you too
All this energy we have is uncontrolled
But I'm crashing like a wave
'Cause you held me under
Until the water froze

I cannot stand the cold, cold, cold, cold, cold, cold
Cold, cold, cold, cold
I cannot stand the cold, cold, cold, cold, cold, cold
Cold, cold, cold, cold

This is more than just a game
More than pixels in a frame
We're not fiction
You expect the things you don't
And ignore the things you want
You're a contradiction
And who is in control
Am I the puppet or am I
(The witness to your show)
Take me far away
'Cause I've got to let you go
(Got to got to let you go)

I can't stand it when you come too close
The feeling takes me under
I hold my breath so I can hold my own
Just feels like everything I've ever known
Is just how to be alone with you

Seems like nothing is ever gonna change
Just let me walk away
'Cause I can't imagine standing without pain
I'm falling for you too
All this energy we have is uncontrolled
But I'm crashing like a wave

'Cause you held me under
Until the water froze

I cannot stand the cold, cold, cold, cold, cold, cold
Cold, cold, cold, cold
I cannot stand the cold, cold, cold, cold, cold, cold
Cold, cold, cold, cold
I cannot stand the cold
I cannot stand the cold

I'm falling for you too
All this energy we have is uncontrolled
But I'm crashing like a wave
'Cause you held me under
Until the water froze
(The water froze)
(I cannot stand the cold)

Feels like nothing's ever gonna change
Feels like nothing's ever gonna change
