

Ohh ah, mm

Right now I'm feeling kinda hazy, yea  
Did I catch your eye? Did I catch your eye? yeah yeah  
Why's everybody getting naked?  
Whoa, am I alright, am I too high? yeah  
And I thought I'd be stressing no vacation  
With a normal life, and a pretty wife, no  
We're both a little tipsy, and now you're leaning on me  
Girl I don't really mind

Running your hand through my hair, got me feeling alright  
And If you lay on the bed, we'll be up till the light  
No I don't really care what we get up to tonight  
So whatever you prefer, that's what I prefer  
Running your hand through my hair, got me feeling alright  
A little rush to the head, slow it down if you like  
And we don't have to share what we get up to tonight  
So whatever you prefer, that's what I prefer

Try'na Romeo, wanna play along?  
There's a part of you that a part of me really wants  
And I'm not gonna lie, haven't done this many times  
Don't it feel good, don't it, don't it feel good  
I can't believe what you're whispering to me  
Need excuses to leave, let's not make it a scene  
Take it slow, walk back to the party now  
Everybody singing loud, everybody's singing

Running your hand through my hair, got me feeling alright  
And If you lay on the bed, we'll be up till the light  
No I don't really care what we get up to tonight  
So whatever you prefer that's what I prefer  
Running your hand through my hair, got me feeling alright  
A little rush to the head, slow it down if you like (down, down and we don't  
)  
And we don't have to share what we get up to tonight  
So whatever you prefer, that's what I prefer

I just want to end the night with ya  
Waste a little bit of time with ya  
Get away from all the hype, tell me tell me what you like  
I just wanna feel the vibe with ya, mm

I just want to end the night with ya  
Waste a little bit of time  
Get away from all the hype, tell me tell me what you like  
If the feelings alright, we'll be up until the light  
Don't care what we do tonight, cause you're what I prefer  
You're
