

Love

Dream On, Dreamer

I saw our world begin to change
I felt you chasing me away
I wanna know why can't it just be the way it always was
And it hurts to say that we don't mean a thing

Can't you see
There's cutting us open again
Let it bleed
I know you love the way it feeds the flames
Can't you see
We're driving in slow motion for the edge
Take a breath
We don't want anything else

The truth is this is hard enough to say
Without you getting up and walking away
So sit there as I say what I have to say
I noticed, darling our love has changed

I saw our hearts begin to break
I know you struggle with the pain
I wanna know how can we just think that it can be this way
And it hurts to know that nothing stays the same

Can't you see
There's cutting us open again
Let it bleed
I know you love the way it feeds the flames
Can't you see
We're driving in slow motion for the edge
Take a breath
We don't want anything else

The truth is this is hard enough to say
Without you getting up and walking away
So sit there as I say what I have to say
I noticed, darling our love has changed

Can't you see
The truth is this is hard enough to say
Let it bleed
Without you getting up and walking away
Can't you see
So sit there as I say what I have to say
I noticed, darling our love has changed
Darling, our love has changed

Can't you see
The truth is this is hard enough to say
Let it bleed
Without you getting up and walking away
Can't you see
So sit there as I say what I have to say
I noticed, darling our love has changed
Darling, our love has changed

And now our love has changed

And we won't last
And now our love has changed
And we won't last
