

Twin Flame

Dreamer Boy

You showed up like a dream I had last night
Like a flicker across my sky
Now you're gone and I don't know why
My Little Dipper
Where are you now?
Thinking, "Where we'd be if we had more time?"
Who we were when we got so high
Now the summer just passes by
A little quicker
Where are you now?

I think that you're just like me
We burn too bright and overheat
Don't get too close
Don't get too close
Only miles from the sun
We wonder how to love someone
Don't get too close
Don't get too close

Were you lost?
What did you see
While you were out there searching for me?
I always survive by forgetting
But now I can't shake the memory
No, I can't shake it

I think that you're just like me
Just like me
We burn too bright and overheat
Don't get too close
Don't get too close
Only miles from the sun
From the sun
Wonder how to love someone
Don't get too close
Don't get too close

Don't get too close
Don't get too close
Don't get too close

I think that you're just like me
We burn too bright and overheat
Don't get too close
Don't get too close
Only miles from the sun
Wonder how to love someone
Don't get too close
Don't get too close
