

Nothing but the Truth

Dreamshade

I look out there
If only we were aware
Well done judging others but not ourselves:
Nothing but the truth
Years spent exploiting
And in the dark wandering
Gaia's voice gives no choice and tells nothing but the truth

The words we say are fading away
Leave me alone for a moment
When all the pain just finds a way inside of me
Shake off the lies that don't make us free

Entering this wounded land
In a lifetime we've lost our path
Blown away like grains of sand
Can't believe how low we fell

Ideals that break
We're swimming in our mistakes
With the left hand raised we swore to say
Nothing but the truth
A plastic kingdom
Our resource wasting syndrome
We just need a shock to make us wake up
Nothing but the truth

The words we say are fading away
Leave me alone for a moment
When all the pain just finds a way inside of me
Shake off the lies that don't make us free

Entering this wounded land
In a lifetime we've lost our path
Blown away like grains of sand
Can't believe how low we fell

My thoughts keep me awake
But I know that we can change day by day

Entering this wounded land
In a lifetime we've lost our path
Blown away like grains of sand
Can't believe how low we fell

Entering this wounded land
In a lifetime we've lost our path
Blown away like grains of sand
Can't believe how low we fell
