Jamais Vu

dredg

I looked to the sky
Saw my body die
Gotta reappear up there
It's where I want to be
In the university
I've found I've found my own college
I've found I've found a way to resolve this

I’m not inside you
You're all around me
Is this what you needed to have to comfort you
I waited all this time above you

Is this what you wanted
Is this what you needed to have
Take all that I've known
Is this what you wanted
Is this what you need me to fear
Take all that I've found...

I’m not inside you
You're all around me
Is this what you needed to have to comfort you
I waited all this time above you

I looked to the ground
Was pleased with what I found
Gotta reappear up here
It's where I'll always be
In the university
I've found I've found all my problems
I'm gone I'm gone finally solved this

I’m not inside you
You're all around me
Is this what you needed to have to comfort you
I waited all this time above you
