

Psychedelic, the world's just infusions
Parking in his lot, I wanted intrusion
Before he saw what he was losing
Too late for reaction, always refusing
Living a regret's always gaining respect
Someone learned in me and more than a test
More in it for me than you watch this

My gain is your loss, your loss is my gain
My gain is your loss, your loss is my gain

Supercalifragilisticexpialidocious
Swarming you and entrapped like pocus
Battery max only links like psychosis
Bringing you only green atrocious
Wonder Woman is after the natural born master
I don't care who stuck doors like plaster
Bloody nose and the sickness grows faster
Brings some now if you don't you bastard

My gain is your loss, your loss is my gain
My gain is your loss, your loss is my gain

Do what you want to say. Don't you feel right
(Repeated with alternate words)

Fabulous, rapulous, say what you create
Code line the shit makes you wrapped up crap leg
Send you on a journey through time, envision
Excursion that will take you apart and separate the mission, in
cision
Coming into mind not to see you anyway
Little bit more, not just the big way
Gonna be important but not in that way
Done it before, I'll just see ya

You won't detest us in my way
You won't detest us in anyway
(Repeated with alternate words)

My gain is your loss, your loss is my gain
My gain is your loss, your loss is my gain
