

# You Brought The Party

Drew Baldrige

I brought the coke, I brought the rum  
I brought a few of my friends that like to have 'em some fun  
I want a spot to rock till dawn  
I even brought my guitar so I could sing you a song

But you brought the party  
You brought the show when you showed up  
Yeah, you got it started  
I mighta put a little buzz down in your cup  
But you brought the party

[?] we're rocking now  
You got all the boys looking, showing all the girls how  
You brought that body, that come-on smile  
You brought that oh-my-my, this night is gonna get wild

Yeah, you brought the party  
You brought the show when you showed up  
Yeah, you got it started  
I mighta put a little buzz down in your cup  
But you brought the party

When you walked in tonight you flipped that switch  
From a regular time to as good as it gets

You brought the party  
You brought the show when you showed up  
Yeah, you got it started  
I mighta put a little buzz down in your cup  
But you brought the party  
You brought the show when you showed up  
Yeah, you got it started  
I mighta put a little buzz down in your cup  
But you brought the party  
You brought the party
