

I've Got You

Drew Holcomb & The Neighbors

I saw stars like a blanket
I saw people just like me
There was a light moving forward
I've got the world and I've got you

There was a song they were singing
There was a window to the moon
I saw laughter like a promise
I've got the world and I've got you
I've got the world and I've got you

I've got a dream over my shoulder
I've got love tied around my waist
I've got a big imagination
I've got the world and I've got you
I've got the world and I've got you

I've got a dream over my shoulder
I've got love tied around my waist
I've got a big imagination
I've got the world and I've got you
I've got the world and I've got you
