

## Scorpio

Drew Sycamore

You know you took me high  
But somebody else could take me higher  
How could I give you peace of mind?  
You could have loved me when you had to

You know that I tried  
That I tried, don't deny  
You know that I tried, love

We're under the same stars but apart  
But you're not the only broken heart  
There's never a right time to let it go  
Maybe I'll be back the day I know  
How to love a Scorpio

You know we'd touch the sky  
But I have descended to a liar  
You never knew what was on my mind  
But you could have asked when you had the chance to

Too late to say you tried  
Say you tried, don't deny  
It's too late to say you tried, love

We're under the same stars but apart  
But you're not the only broken heart  
There's never a right time to let it go  
Maybe I'll be back the day I know  
How to love a Scorpio

We're under the same stars but apart  
But you're not the only broken heart  
There's never a right time to let it go  
Maybe I'll be back the day I know  
How to love a Scorpio
