

ALONE

Dro Kenji

With you sitting right here by my side
Will I have to keep on burning fire
Alone, alone
If you swear your mine and no else could ever ever make you smile
Don't leave me alone, alone

You know it's a challenge, can you throw me a bone
I'm in the Rolls-Royce truck wanting to go home
In the drugs I trust, I'm always gone
I push my luck, I'm never wrong
And you know I solved the problem
Wake up get high can't feel no more (no more)

If you love me never say never again cause I'll never get any sleep
If I heard your whisper one more time it'd forever ever be in my dreams

With you sitting right here by my side
Will I have to keep on burning fire
Alone, alone
If you swear your mine and no else could ever ever make you smile
Don't leave me alone, alone

Don't text my phone, leave a message leave it at the tone
I know you won't come right to the clique and to the home
Nothing you can push up on me, I'm gon' hold my own
I've been fucked up losing my mind every damn night
I've been trying to help out, my tears out cry
I've been numbing, that's why my eyes so fucking red
I've been trying, my heart so I won't ever dead
Niggas say they know me, but I know that it's lie
Know that you in trouble when you lie straight to my eyes
Should of seen it coming your the devil in disguise
Try to keep it pushing but it's crazy cause I'm fly

With you sitting right here by my side
Will I have to keep on burning fire
Alone, alone
If you swear your mine and no else could ever ever make you smile
Don't leave me alone, alone
