

# FASTER

Dro Kenji

Reach inside my chest and rip my heart out  
I haven't had no use for this shit  
I just smoke all my feelings away  
If I don't you'll stay stuck in my brain

Higher, faster  
I need you here right now  
Wire, razors  
I'm just tryna break out  
Should've never made her into what I'm seein' now  
I created a monster

Lights on, open up, let me hear your thoughts  
Bottle up your anger and blame it on me  
Shawty might try to go out bad, real sad  
Why the fuck you wait around for me to throw you in my past?

Lights on, open up, let me hear your thoughts  
Bottle up your anger and blame it on me  
Shawty might try to go out bad, real sad  
Why the fuck you wait around for me to throw you in my past?

Forever way too long way for me and you, I know we'll never last  
I can't trust so the Glock stay in my pocket, uh, ready to blast  
Automatic beams, I'll race to you, bae, where you at?  
When it end I can say I really tried, oh well  
Fuck love, I tried my best but I just wanted to love you more  
You're mine although my words come out tangled

Higher, faster  
I need you here right now  
Wire, razors  
I'm just tryna break out  
Should've never made her into what I'm seein' now  
I created a monster

Lights on, open up, let me hear your thoughts  
Bottle up your anger and blame it on me  
Shawty might try to go out bad, real sad  
Why the fuck you wait around for me to throw you in my past?

Lights on, open up, let me hear your thoughts  
Bottle up your anger and blame it on me  
Shawty might try to go out bad, real sad  
Why the fuck you wait around for me to throw you in my past?

Pass the bottle  
I could take another shot or two  
I have yet to take a drug that make it feel like me and you together  
I made you a song, making millions off these love letters  
Ain't no other option, I know exactly how to get her wetter  
Behind that, I know her mind, I need to get mine back  
The way you lie to me hit just like crack, fucked up  
The way you love me got me so sidetracked  
I need another dose to bring me back (Ooh-whoa)

Higher, faster

I need you here right now  
Wire, razors  
I'm just tryna break out  
Should've never made her into what I'm seein' now  
I created a monster

Lights on, open up, let me hear your thoughts  
Bottle up your anger and blame it on me  
Shawty might try to go out bad, real sad  
Why the fuck you wait around for me to throw you in my past?

Lights on, open up, let me hear your thoughts  
Bottle up your anger and blame it on me  
Shawty might try to go out bad, real sad  
Why the fuck you wait around for me to throw you in my past?
