

MARS

Dro Kenji

Yea sold dreams
Lies of pretty things
I get a bad vibe from you

We should go to Mars (we should go to Mars)
Baby you're so damn far away right now (Baby you're so damn far away)
Can I get you to myself (can I have you to myself)
Baby you are the only one I really want, I really want, I really want, I really want, really want

Hide drugs if the police come
Be my drug I'll ditch my plug
Let's smoke dope yea, fill our lungs
While you fill up my head with your toxic poems
You never needed me, why weren't you there
In an alternate universe maybe you'd care
I'm drunk out my body and needing you here
Bitch I'm drunk out my body and needing you here

Hey, (hey) high out my body I don't even feel (feel)
This my life bitch I'm gonna kill (kill)
Every single breath I'm too ill (ill)
This light of mine, always one more time, you would always lie ain't nothing new
I'm in your space can't get comfortable
What the fuck am I supposed to do oh

Fly across we can touch the stars (stars)
She a red head she look like Mars (ooh)
She like where should we go ain't nothing far, far, far, far

We should go to Mars (we should go to Mars)
Baby you're so damn far away right now (Baby you're so damn far away)
Can I get you to myself (can I have you to myself)
Baby you are the only one I really want, I really want, I really want, I really want, really want

Hide drugs if the police come
Be my drug I'll ditch my plug
Let's smoke dope yea, fill our lungs
While you fill up my head with your toxic poems
You never needed me, why weren't you there
In an alternate universe maybe you'd care
I'm drunk out body and needing you here
Bitch I'm drunk out my body and needing you here

High floating off the ground what's in the air
Fiening itching like a needle when Im needing you here
I Hope you know I never meant make you feel like shit and make you think that nobody care
But ain't nobody care
Stuck in my head it's a prison in there
I'm in love with your body I'm needing you
I'm miss that pussy it's wet like the water (the water)
Baby I'm tryna get near you

Fly across we can touch the stars

She a red head she look like Mars
She like where should we go ain't nothing far, far, far, far

We should go to Mars (we should go to Mars)
Baby you're so damn far away right now (Baby you're so damn far way)
Can I get you to myself (can I have you to myself)
Baby you are the only one I really want, I really want, I really want, I really want, really want

Hide drugs if the police come
Be my drug I'll ditch my plug
Let's smoke dope yea, fill our lungs
While you fill up my head with your toxic poems
You never needed me, why weren't you there
In an alternate universe maybe you'd care
I'm drunk out my body and needing you here
Bitch I'm drunk out my body and needing you here
