

Smoke 'til I can't
Killswitch on the beat
Census what you cooking?

Smoke 'til I can't see no more
My eyes shut, the smoke screen keep fucking up my vision
Vision, I can see the future and past with you
You might be feeling like you stuck, but I broke through
I got a section in my heart, it's all for you
I try to get a little drunker when I miss you, hold on, slow down
A little more I want to push it, 'til you tell me what you really want
I can tell I push your buttons but she love it, she a push to start
Hold on, you testing me baby?
You know I need you right here
Instead of next to me baby

This the hardest thing I ever had to say to you, but now I see that I can never trust again
My cold inside, probably won't ever warm up again
Are you hearing me whoever you are? Yeah I really mean whoever you are, yeah
I really mean whoever you are
I know love can do some damage, that shit left me a scar
But you just got to lift your head and keep protecting your heart

Smoke 'til I can't see no more
My eyes shut, the smoke screen keep fucking up my vision
Vision, I can see the future and past with you
You might be feeling like you stuck, but I broke through
I got a section in my heart, it's all for you
I try to get a little drunker when I miss you, hold on, slow down
A little more I want to push it, 'til you tell me what you really want
I can tell I push your buttons but she love it, she a push to start
Hold on, you testing me baby?
You know I need you right here
Instead of next to me baby

And I'm just tired of giving love, and that shit just don't even apply here
Don't know if it's just me, behind my back
How she ride for me, like the trust getting out of hand
But this shit don't stop for me
I just want to tell you all my problems
Maybe yours are similar, shit maybe we can solve them
Shawty she level up, throwaway the topic
Often I feel all alone and I don't know to stop it

Smoke 'til I can't see no more
My eyes shut, the smoke screen keep fucking up my vision
Vision, I can see the future and past with you
You might be feeling like you stuck, but I broke through
I got a section in my heart, it's all for you
I try to get a little drunker when I miss you, hold on, slow down
A little more I want to push it, 'til you tell me what you really want
I can tell I push your buttons but she love it, she a push to start
Hold on, you testing me baby?
You know I need you right here
Instead of next to me baby
