

SINCE DECEMBER

Dro Kenji

(Census, what you cookin'?)
Tidal wave, tidal wave, whirlpool
All my diamonds lookin' real good, so cool
Rings hittin' like a star and it make her drool
Ten hours out the day that I cater to you

You know I don't really fuck with love
But with you, I feel like I could take the world over
You know I don't really fuck with love
But with you, I could take the world over
Memories, ashes, I can't remember
Stuck inside my head since December
We can glide on sunsets of ember
Any and everything that you wanted
She know I'm a superstar, a superstar
She just wanna be around for the best part

Never think I really felt love for real
Had a really fun time getting over my ex-bitch
Shawty fucked the gang but say she love me in my texts
Trapped in hell with love and I've been lookin' for the exit
Don't know where to turn when the smoke fill the air up
Let me know if falling in love is what you scared of

And wash away like a tidal wave
Wash away, wash away, wash away
Our love wash away like some blood in the rain, but that's okay

You know I don't really fuck with love
But with you, I feel like I could take the world over
You know I don't really fuck with love
But with you, I could take the world over
Memories, ashes, I can't remember
Stuck inside my head since December
We can glide on sunsets of ember
Any and everything that you wanted
She know I'm a superstar, a superstar
She just wanna be around for the best part
