

SMILE

Dro Kenji

Yeah

Had a hard time adjusting to change
We can go past the limit, I just can't take it from no one else
Battle scars we thug it out, and if you're lucky
Nothing else can take your smile away

Smile, smile, smile if I bring you here, here, here
I just wanna see you, smile smile smile
Then when they play my songs, they finna know that I'm addicted
to you

I broke the ice, it broke my head and heart in two, I hope I fall in rice
Keep your thoughts from going in loops, that's my best advice
Keep your feet underneath you, you, you (Keep your feet underneath you)
Show me that you worth what you think I got up my sleeve
It hurts, you act like you don't miss me
Is the real world hit or miss
Why you still on my mind?
I rarely reminisce, but it's something about you

It's all written down in my head
It's all written down in my head
Something about you
It's all written down in my head
It's all falling down

Had a hard time adjusting to change
We can go past the limit, I just can't take it from no one else
Battle scars we thug it out, and if you're lucky
Nothing else can take your smile away

Smile, smile, smile if I bring you here, here, here
I just wanna see you, smile, smile, smile
Then when they play my songs, they finna know that I'm addicted
to you

Smile smile smile if I bring you here here here
I just wanna see you smile, smile, smile
Then when they play my songs, they finna know that I'm addicted
to you
