

# Virus

## Dropout Kings

Suffering in silence  
(In a cage with my inhibition and anger)  
All these sacrifices  
(No rest for the wicked living in danger)

Suffering in silence  
Leave me with my vices  
All the sacrifices  
Eat me like a virus

I been infected by the virus  
One that thrives from inside us  
Kids at home shouldn't try this  
Self-done surgery  
Medical table burgundy  
3rd degree burns, spirit rising like heated mercury  
These words cut deep  
But they gotta to check your soul caliber  
Face the champion, challenger  
Everyday on the calendar swinging 'gainst Excalibur  
Runnin' from fate makes a tested cardiovascular  
Systemic epidemic like blemishes on your temper  
Pistol right to your temple  
It could all be so simple  
Giving into depression and psychological weapons  
But mental shots on a giant just make 'em extra defiant  
Earn the eye of the tiger, heart of lion  
When standing up to the violent rampages of raging tyrants  
That rave in your veins  
In hopes to corrupt your heart and your brain  
Only through true love we sustain

Suffering in silence  
(In a cage with my inhibitions and anger)  
All these sacrifices  
(No rest for the wicked living in danger)

Suffering in silence  
Leave me with my vices  
All the sacrifices  
Eat me like a virus

Holding me down, down, down  
(Tryna get me, I won't let you in)  
Holding me down, down, down  
(Go against me, you can never win)

Holding me down, down, down  
(Tryna get me, I won't let you in)  
Holding me down, down, down  
(Go against me, you can never win)

Hold me down  
Make me weak  
Feel my fears now

You're never wrong

I'm never right  
See my side now

The sooner the sooner I cave  
The closer I get to get my grave  
Feels like a whole life time waiting for this

Suffering in silence  
(In a cage with my inhibitions and anger)  
All these sacrifices  
(No rest for the wicked living in danger)
