

# Get Down

Dub Fx

Roaming through the streets of the lowlands  
Everything is golden do you see the river that be flowing?  
Straight from my consciousness  
I press on the stress, I'm shooting into space no less  
Grooving to the bass we bless  
Resonating all of your chest, levitating high with the best  
So let me slide in with a kiss  
You reminisce while I clench a fist  
But we all pacifists not activists  
All this randomness is just fabulous  
I'm just cramming this while you be slapping tits  
Thinking happiness is only round the twist  
But I like to reminisce on my life cous'  
I like to shake my fist like my crowd does  
I really do insist that we find love  
And if you into peace throw the sign up

I'm gonna get down on the clouds above  
I'm gonna sing loud to the ones I love  
I'm gonna take charge in the life I lead  
Never gonna let go to the air I breath  
I'ma work hard for the things I want  
I'm gonna show respect to the things I've got  
And I'm right here in the place to be  
Not being no one else only ever being me

Calling all the leaders, alchemystic healers and the seers  
Combining forces leaving disbelievers  
Light the way, bring vibes throughout the day  
From the base to the airways, eeven the dark places  
Been through the rat race but now I'm out  
Babylon's burning so I'm all about finding freedom from within  
Yes I'm finding freedom from within  
Now lay the track and let me sing  
About the highs and lows  
And even all the in-betweens  
They gonna try and cage you but you gotta grow your wings  
Fly off before they trap you in  
Stay awake positively vibin'  
Dropping all the baggage be the one to be deciding  
It's my birthright in my life my right to be thriving  
Don't press on me oh mr downpressor man  
I'll clear my energy I'm only ever being me

I'm gonna get down on the clouds above  
I'm gonna sing loud to the ones I love  
I'm gonna take charge in the life I lead  
Never gonna let go to the air I breath  
I'ma work hard for the things I want  
I'm gonna show respect to the things I've got  
And I'm right here in the place to be  
Not being no one else only ever being me

I was flying on my high, in the dam, I rock steady  
About to hit the square, get the crowd all heavy  
Chef Dub, let the beat sizzle  
Spice it with that beatbox and make a mouth dribble

Raw, original, no artificial, the flavour saver, lyric baker  
Take that street corner a make a  
Whole city block Jam  
Kicking up dust everywhere we land man  
And are you feeling what we feeling  
If you feel good put your hands to the ceiling  
Convoy in effect did you get the meaning  
All in together now roll through the evening  
Time to forget what you believe in  
No matter the shape, colour we all breathe in  
Negative vibe let the rhythm do the stealing  
I'm trying to be me, this is no mass appealing  
Like Johnny 5 alive  
There's no short circuit we human inside  
You build walls we crush em like Berlin  
Cast spells on speakers, magic from Merlin  
Damn diggi-don't say nothing, light one up  
Take a big puff in, exhale wind steals it all  
I'm up in the clouds, man it's a free fall
