

# Run

Dub Fx

I see you run when I say WHATAGWAN  
I see you run like a bullet from a gun  
All day and night you run and hide (2x)

I see you run like a bullet from a gun  
When me saying WHATAGWAN  
Where you're going Paesan  
You see me when I come with a spirit that weigh a ton  
In a fire that just begun and now your feeling out done  
So take a deep breath, you got to release stress  
Life is not a beep test running is a weakness  
And you can't hide in that smoke that you blaze  
It shines a light upon your negative ways

Wake up wake you been missing all the fun  
We been dancing and laughing connecting each and everyone  
Inspiration from the sun, the bass and the drum  
The strings that we strum has only just begun  
You need to slow down let me give you this low down  
Life is not a show down come back to your hometown  
And you can't hide in that smoke that you blaze  
You need to open up your heart and meditate  
(but) I see you run when I say WHATAGWAN  
I see you run like a bullet from a gun  
All day and night you run and hide (2x)

Calling out, can anybody hear me?  
Shine your light if you're able and you're willing  
I see you run but can you stand strong?  
Keep a grip while you weather the storm  
You know your own mind  
You know what feels right  
Leave a marker on this life  
Open heart, open mind  
Life's to short don't waste it (listen)  
Don't run, stand and face it. (Watch out)

Don't let them trouble you trouble  
Cause if they ever bring you down  
They will struggle to struggle  
Strip you bare and steal your crown  
Lesson one you are nobody's fool  
They bring you lies on a plate then refuse  
Never let go keep it coming  
Live your life it's really something  
Heart of a warrior, keep your head up stand tall  
There's no need to run when I say WHA GWAN  
There's no need to run like a bullet from a bullet from a... I  
  
see you run. . .you run and hide
