Sitting here in this parking lot in the tightest spot
I with you, you with me, well, sometimes mostly you're not
Like to stare off in space in between sentence you stop...
Talking to escape through chapters up top you keep locked
Always smoke the indica cause your brain needs a break
Got no idea what you be going through.
How you make it?
It's that time of the year, time of the month, time of day
Even warriors need euphoria; they'll go crazy

She say she don't wanna be 30 years old asking what's the tea
Clicking on pictures, tryina envision places she really wanna see
Baby don't try to solve it all one one day
How bout this I know your feet hurt so let's dip
Let's skip to your place. I'll massage them till you snoring
Fuck that silly bitch you work with
Eat that hoe for lunch and burp it
Ask me if I wanna see heaven
Girl with you my life is perfect
God can wait no shame to say but your soul's yearning
It'll keep burning till you cross cross paths with your purpose so inhale an
d keep on searching... searching... searching

I can slow it down if you want me to
I don't know how slow I can get
This bounce feel way too good
Tell Jody to pass that

I'm in my car parked
Posted on the block
Me and dogs hot box box
Window foggy la la la
The police go knock knock knock
Kiki turn that down
Cause ya'll be blowing loud
Blah blah blah they be
(They be wild)
Anyway
Got the middle fingers up as well
Point the fingers to the 12
Funny that weed is legal but them d boys sitting in them cell
Set that homies free
Free as bird free as a bee
Free as the leaf that from the tree that blew to me
Its that

Super bounce...
