

## Time...

Duckwrth

Everything above is the same down below  
Big bang the universe remains to grow  
Sun shows and the flowers starts to grow  
Everything above is the same down below  
Uh, yeah, it's the same down below  
Big bang the universe remains to grow  
Sun shows and the flowers starts to grow  
Everything above is the same

Check it out  
Kickin' it with Jonah in the belly of the beast  
And feast in the black hole eating Ki-sha  
Told me we should meet around 3  
And bring your own beef like it was B-Y-O-B  
But I refuse to beef like a V-E-G-A  
End of that act we make enough from all the he say  
She say callin' all your aunties on the three way  
Lookin' for the safest place for the land to give her leeway  
But sometimes on that battleship she just get to battlin'  
Even challenging the Vatican at who's the holiest  
I'm hopin' it  
Everyday is church me and my holy men  
Sippin' holy water breakin' bread hope for sodium  
Cause we don't like a salty situation on the podium  
Catch an upper cut like the holy ghost (left hook, right hook, blau)  
Think you're home alone blow a holy smoke  
Mama catch you smack you in the face like Macaulay Culk  
She don't like you smokin' but at least it ain't Macaulay Coke  
Booger sugar got em harlem sugar bakin' soda cookin' lookin'  
To forget the dark place that their father took em'  
Or the lack thereof  
Cause if there ain't no sun there ain't no summertime fun  
But replace the super soaker with that handheld gun  
Replace that backyard pool with a pool of blood in your backyard  
Heart beats is just a pace of fast you on that NASCAR  
Start to moving in that light speed likely you may end up on Jupiter  
Find your wifey your old bitch starts to maneuver her  
The next thing you know she Mr. Moon  
The next thing you know she birth the stars  
Don't let that past rotation affect your presentation  
Too much anti-matter results in annihilation  
We're just some some [?] looking for some annihilate then  
So we can love in basketball jumpshot, no fader

Everything above is the same down below  
Big bang the universe remains to grow  
Sun shows and the flowers starts to grow  
Everything above is the same down below  
Uh, yeah, it's the same down below  
Big bang the universe remains to grow  
Sun shows and the flowers starts to grow  
Everything above is the same

Now I told you that these thoughts are moving light speed  
I time travel every time I look at old pics  
I'm counting all the minutes on my timepiece  
12, 3, 6, 9

12, 3, 6, 9

I'm trying to fit within time

Within time I fit fine

Until then I buddha shrine

Fat head with uber rhymes

With more lines in the I Ching and an inkling of hope

For generations next that we are teaching

Wait, what the fuck is it we teaching?

Fast food, thoughts of places on turn cuisining

Beni Hana chopper screwed

Let me slow it down and show you skinny mama raisin' 2

Babies with no poppy too

Teach em how to build a foundation' like he's supposed to do

What does it feel when someone avoiding you

(Tick tock, damn, damn, damn, damn)

Now imagine that same thing in the adolescents youth

The absence of a sun can stunt the growth of a tulip

And false promises that exit out your two lips

It's better to say nothing than try to make the truth twist

Moral of the story it takes two to birth a child

Mother staying or because it's you that nurtures child

Father keep rotation cause it's you that disciplines

Balance makes the strongest structure that withstands the illest wind

And if the wind of time can blow me back to simple times

I swear I'll save it be quarter, nickle penny dime

And by night I'll be a quarter millionaire a fine

And then I'll buy a time machine and take me back (way back)

To the day that James Brown wrote that proud is black (way back, run it back

)

A time machine to take me back (way back)

To a day that black folk don't smoke no crack (run it back)

I'll buy a time machine to take me back (way back)

I'll buy a time machine to take me back (back, back...)
