

Together

Duke Dumont

We come together, together
We come together, together
We come together, together
We come together, together

Together, brighter than the strobe lights
Together, lookin' out to space
Together, no one's gonna stop us
Together, life can find a way
Together, lookin' at the sunrise
Together, we can ease the pain
Together, guided through the darkness
Together, life can find a way

We come together, together
We come together, together
We come together, together
We come together, together

Together, brighter than the strobe lights
Together, lookin' out to space
Together, no one's gonna stop us
Together, life can find a way
Together, lookin' at the sunrise
Together, we can ease the pain
Together, guided through the darkness
Together, life can find a way

We come together, together
We come together, together
We come together, together
We come together, together
We come together, together
We come together, together
We come together, together
We come together, together

Together, together
Together, together
Together, together
Together, together
Together, together
Together, together
Together, together
Together, together
